London, UK ambrisabelle@gmail.com

Education

Oxford University - Master of Mathematical and Theoretical Physics 2:1

October 2025 - Present

- Classes in fundamental physics disciplines: machine learning, quantum field theory, quantum information, quantum error correction.
- Dissertation in Gauge Theory Gravity

Massachusetts Institute of Technology - Bachelor in Physics 4.7/5.0

September 2020 - May 2024

- Classes in fundamental physics: quantum mechanics, differential equations, fundamentals of programming
- Undergraduate research in quantum pilot wave hydrodynamics and Bell violations

Employment

Seal - AI & Algorithmic Process Automation

June 2026 - Present

- Engineered bespoke AI-integrated software architectures at client sites, translating user requests to automate data entry, sharing, and storage to systematically reduce persistent errors.
- Executed on-site system installations and led technical training programs, ensuring effective client adoption and utilization of the platform.

MIT School of Mathematics - Undergraduate Researcher

October 2023 - June 2024

- Wrote Python scripts to simulate droplet trajectories through different environments, which used Monte Carlo and Diffusion process simulations.
- Analysed experimental data using pandas in python to support the possibility of classical Bell violation.
- Contributed to Professor Bush's next publication by providing a mechanism to achieve Bell violation through the use of integrals of non-commuting random variables. DOI: 10.1103/PhysRevFluids.9.084001

Skills

-
- Creating trading model to execute statistical arbitrage in crypto markets
 - Quantum Error Correction and Machine Learning
 - Leetcode Machine Learning, Data Structures and Algorithms
 - Python with pandas and yfinance
 - Natively fluent in English and French
