

Isabelle A. Rose

7359 893540 | ambrisabelle@gmail.com | 34 Courtfield Gardens, SW5 0PH, London UK

Education	Oxford University	In Progress
	Master of Mathematical and Theoretical Physics	
	Relevant Coursework: QFT, CFT, String Theory, General Relativity	
	Massachusetts Institute of Technology	GPA: 4.7/5.0
	Bachelor of Science in Physics	
	Relevant Coursework: Fundamentals of Programming, Introduction to Algorithms, Mathematics with Applications in Finance, Probability and Random Variables, Hydrodynamic Quantum Analogs	
Work Experience	Revature Training	Jan - Apr 2025
- Increased proficiency in Java for front and backend development, focusing on object-oriented programming and algorithms. - Learned SQL for database management and optimizing relational databases.		
	Physics Instructor, Lexington Science Academy	Sep 2024 - Present
	- Managed client relationships and marketing, gaining seven new clients in three months for the new company. - Designed syllabi that taught university-level mathematics to high school students in their preparation for Mathematics and Physics Olympiads, including in probability, combinatorics, and multivariable calculus.	
	Undergraduate Researcher, MIT School of Mathematics	Feb – June 2024
- Wrote Python scripts to simulate droplet trajectories through different environments, which used Monte Carlo and Diffusion process simulations. - Analysed experimental data using pandas in python to support the possibility of classical Bell violation. - Contributed to Professor Bush's next publication by providing an mechanism to Achieve Bell violation through the use of integrals of non-commuting random variables.		
Awards	British Physics Olympiad, British Mathematics Olympiad medalist	
& Skills	Languages – English, French (native)	
	Programming Skills – Python (with numpy, sympy & pandas), Java, SQL	
	Interests – Fundamental Physics, Education, Karate and Aikido, LARP Design , Literature
